

## **CORRUPT PUBLIC OFFICIALS**

Yes, I do believe that we are all created and that there is a higher power of existence. I do believe that no weapons formed against those that believe in the almighty will prosper. If you ask, I must say that the attempts of the state against me are not in line with those powers of creation. And yes, I further believe that the snowfall on my birthday 2011 was meant to comfort me.

As it relates to the court documents filed and the laws relating to them, I believe that a Writ of Mandamus should have been issued, and that as a federal court dispensing what is correct in the law, that the judge on behalf of the state of Connecticut and the beliefs of that judge as a conservative republican was no accident. I believe that the word "shall" in mandating the benefits to injured employees is bias and skewed in the favor of white people and opposes black people.

I further believe that the almighty called to judgment that very person charged with dispensing such justice and his failure to do so brought about his illness. I also believe that those in conspiracy with these frauds and discriminations have only been given an opportunity to correct themselves as a measure of justice from the creator will be dispensed upon them, lest they repent and rectify their errors.

I further believe that the equation, as all the other materials that are my property, was attempted by the court and the public official defendants to be stolen and subdued through the recommendation by the court that I incorporate into my complaint individual capacity arguments. This I believe was meant to cause an advantage in favor of the state by allowing them to counterclaim and request such orders to bind me as to not allow my freedom of speech and intellectual property or arguments against these officials to be published.

Without question, I believe that government public officials are corrupt. The actions of the state defendants without question also violated the standards set by federal policy and procedures regarding the same issue of retirement and disability benefits. Furthermore, the policies established in not only the recent legislative session was strongly influenced by my work product and that the retirement plan that I created in 1995 was used in favor of Michael Cozzolino because he is both white and catholic, and I was not allowed to retire in like fashion because I was black and not catholic.

I believe that the institutional racism that existed from the foundation of this country is still present and functioning within the bureaucratic system of government, not different than that of the old south by similar groups of conservative, white members of society. Finally, I believe that conservative is an encoded term which means racism, elitism and alike. As this is the foundation of the war against black people. This is only my opinion, for those wondering. Attack it, it holds up.

My education is from a predominately white university, the university of new haven. I have learned one important lesson. Not to trust those type people. Only trust in the creator. Something is intrinsically wrong with people like these public officials. They hate us, and at any cost they attempt to destroy us, even when they are the unjust. I BELIEVE he would still be alive today had he made the correct decisions..
